

The poster features a large yellow starburst in the center containing the text '2023 KOSEN Global Camp'. Surrounding the starburst are illustrations of two green printed circuit boards (PCBs) on the left, a blue microscope on the top right, and a beaker with blue liquid and white particles on a stand on the bottom right. A group photo of diverse students is positioned on the left side of the starburst. The background is a light blue gradient with white diagonal lines on the right side.

### About KOSEN Global Camp

#### Experiments and Practices Based Study Program

" KOSEN Global Camp " is short-term KOSEN educational programs taught in English.

It provides the students from overseas institutions and Japanese KOSENs with the opportunities to have hands-on experimental/ practice engineering classes in addition to theoretical ones, and to work together by participating students.

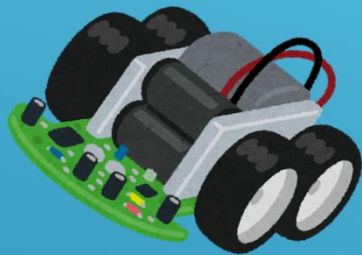

The programs are arranged to offer the essence of KOSEN education which nurtures highly-skilled engineers to play key roles in society.
